## SUMMARY

---

I am a dedicated MERN Stack Developer with one year of experience in creating dynamic and responsive web applications. My technical skills include HTML5, CSS3, JavaScript, TypeScript, React JS, Node JS, Express JS, MongoDB, and front-end frameworks like Bootstrap, Tailwind CSS, Material-UI, Chakra UI, and Ant Design. I have successfully delivered high-performance solutions for several IT industries and international clients, with notable projects like "Content Management Social Media Web App" and "TaskForge." My expertise extends to secure authentication with JSON Web Tokens, CRUD operations, and database management. Additionally, I possess strong UI/UX design skills using Adobe Photoshop, Illustrator, and Figma, and I am continuously enhancing my backend development capabilities. As a Cyber Security major at FAST NUCES, I bring a security-focused approach to web development.

## WORK EXPERIENCE

---

### Web Developer - Dart Marketing

July 2024 - Present

- Developed dynamic websites for international clients based in the US, UK, and other regions using the MERN stack, ensuring high performance and scalability.
- Utilized Webflow and Framer for advanced web design, creating visually appealing and interactive websites.
- Successfully delivered projects for prominent clients including ME2C Environmental, WE2C Environmental, and Deyari.ae.
- Created the Developers Day website using React.js and Tailwind CSS, ensuring a modern, responsive design and efficient code by adhering to best software development practices.
- Collaborated with senior developers to update websites and develop new features, enhancing functionality and user experience.
- Independently designed the frontend for a CV portal, enabling users to upload their CVs to various companies. Integrated a database to collect CVs for different multinational companies.

### Full Stack (MERN) Web Developer - Freelancer

May 2024 - Present

- Served as a freelancer Full Stack (MERN) Web Developer, providing services to international clients from the US, UK, Australia, and Europe.
- Worked on contracts with several companies including Kairiz Cyber Technologies and Mind Hackers, delivering high-quality web solutions.
- Developed and maintained dynamic web applications using the MERN stack, ensuring robust functionality and user-friendly interfaces.
- Utilized Chart.js, Three.js, and multiple JavaScript libraries to enhance web applications with interactive data visualizations and 3D graphics.
- Completed numerous projects on platforms like Fiverr and Upwork, consistently meeting client expectations and deadlines.
- Demonstrated versatility by handling a wide range of web development tasks, from front-end design to back-end integration.

# TECHNICAL SKILLS

---

**Technical Skills:**

- |                         |                      |                     |                   |
|-------------------------|----------------------|---------------------|-------------------|
| • HTML5/CSS3            | • MongoDB            | UI/Chakra           | • Firebase        |
| • JavaScript/Typescript | • Git/GitHub         | UI/Ant Design       | • Shad CN/Uiverse |
| • React JS              | • Bootstrap/Tailwind | • Webflow/Framer    | • Adobe Photo-    |
| • Node JS/Express       | CSS                  | • Chart.js/Three.js | shop/Illustrator  |
| - JS                    | • Material-          | • C/C++/OOP         | • Figma           |

# PROJECTS

---

**Content Management Social Media MERN Web App**

[Link of Github](#)

Introducing our Content Management Social Media Web App, developed using the MERN stack. It features two portals: one for Content Creators to manage posts, images, and videos via Multer and Cloudinary, and another for Users to subscribe to creators and access exclusive content. Strict authentication with JSON Web Tokens in cookies ensures security, while the robust database handles post management efficiently. This project showcases the power of the MERN stack in building a secure, scalable, and user-friendly social media platform.

**TaskForge: MERN-powered Task Management System**

[Link of Website](#)

In this application, users can efficiently manage their daily tasks with a robust CRUD (Create, Read, Update, Delete) operation system. Additionally, it offers secure authentication features including login, sign up, and OTP verification, ensuring user data safety in the database. With both server and client-side rendering, TaskForge provides a seamless experience for organizing and tracking tasks.

# EDUCATION

---

2023 - present

Bachelor in Computer Science (Cyber Security) at **FAST NUCES** (CGPA: 3.43/4.0)

2021 - 2023

Intermediate in Pre Engineering at **Aga Khan Higher Secondary School, Karachi** (Grade: A)

2010 - 2021

Matriculation in Bio Science at **Aga Khan School, Garden** (Grade: A+)

# HONORS AND AWARDS

---

21st September 2023

**Bronze Medalist** at **American Mathematics Olympiad** (Certificate No: A0060131)

21st September 2023

**Global Finalist** at **International Mathematics Olympiad (IMO)**

November 25 2023

**Award of Appreciation** by **AKHSS** for **hitting global position** at **AMO**

July 2021

**Academic Achievement Award** by **AKSG** for securing **85.3 percent** in **AKUEB**
